SUMMARY

I am a dedicated student currently pursuing an Advanced Diploma in Software Engineering (ADSE). I have a strong interest in technology development and am eager to improve my skills. I have good knowledge of programming, web development, and databases, and I enjoy learning new technologies.

I like taking on new challenges and working in teams. I am always trying to learn new skills and improve my work. My goal is to gain professional experience in the IT field and continue enhancing my abilities, so I can build a successful career in software engineering or a related field.

EMPLOYMENT HISTORY

ASP .NET Core Developer - Technocom Development

Karachi, Sindh

October 2025 - Till Date

Technocom Development

Role: .NET Developer

Duration: October 24, 2024 – Present

Description:

Currently working as a .NET Developer at Technocom Development, where I am responsible for making necessary changes and updates to cloud-based software applications based on guidance from senior developers. My role involves enhancing the functionality, performance, and security of cloud-based applications, ensuring they align with project requirements.

CERTIFICATE

Diploma in Information Systems Management

TestDome(Sql)

July 2024

December 2024

MY PROJECTS EXPERIENCES

- Admin Dashboard**

Technologies Used: PHP

Description:

Built an admin dashboard to manage users, view reports, and monitor system activity. The dashboard features a CRUD (Create, Read, Update, Delete) system for managing data. Used PHP for backend development to ensure smooth functionality and proper data handling.
- E-Vaccination Booking System**

Technologies Used: Laravel

Description:

Created an E-Vaccination Booking system where users can register and book vaccination slots online. This project involved developing both the front-end and back-end using Laravel, with features like user registration, login, and booking management.
- FreshShop (E-Commerce Website)**

Technologies Used: ASP.NET Core MVC

Description:

Designed and developed an e-commerce platform (FreshShop) to sell products online. Users can browse products, add them to their cart, and make purchases. This project focused on creating a secure and easy-to-navigate online shopping experience.
